# CITRON DREAMTOUCH

## The new dimension of multitouching.

### Application:

The forward-looking communication platform allows service opportunities through several people simultaneously.

### Technology:

The invisible spanned infrared light curtain can be interrupted with a finger, an object, even with gloves. The **dreamTouch** provides all the benefits of infrared touch technology in safer simultaneous detective and tracking up to 32 contact points.

### Advantages:

It outperforms all common FTIR- and camera based systems regarding:

#### > Reliability

no loss of function in case of failure of individual components

#### > Flexibility

size and depth, regardless of Touch Display type

#### > Ruggedness

no calibration required, withstands mechanical shocks and vibrations

### Specifications:

Size \_\_\_\_\_ 24" up to 82" – others on request  
Frame \_\_\_\_\_ customer specific  
Glasses \_\_\_\_\_ customer specific  
Interface \_\_\_\_\_ USB  
Detection \_\_\_\_\_ up to 32 touch points simultaneous  
Sample Rate \_\_\_\_\_ 50 frames/s  
Software \_\_\_\_\_ TUIO 1.1 Protocol, Windows 98SE up to Windows 7

Citron is your partner for customised industrial monitors and touch solutions.
